

Title: Treasury Operations Mid-Year Review 2024/25

Committee: Finance and Assets Committee

Date: 28th November 2024

Author: Director, Finance

Report No: Z108

Contact Officer:

Ian Smith, Director, Finance

ian.smith@eastcambes.gov.uk; 01353 616470; Room 104, The Grange, Ely

1.0 Issue

1.1 To provide Members with an update on the Council's 2024/25 Treasury Management Strategy.

2.0 Recommendation

2.1. Members are asked to recommend to Full Council that the mid-year review of the Council's Treasury Management Strategy for 2024/25, as set out in Appendix 1, be noted.

3.0 Background / Options

3.1 The Chartered Institute of Public Finance and Accountancy (C.I.P.F.A.) Revised Code of Practice on Treasury Management requires councils to adopt the revised Code and fully comply with its requirements.

3.2 This report complies with the requirement for a mid-year review.

3.3 The size of the Council's investment portfolio is relatively small and often short-term meaning that investment decisions are made so liquidity and cash flow requirements are the priority, this rather than returns. Despite this position, opportunities for proactive investment decisions are taken where appropriate.

3.4 The loan that the Council has made to East Cambs Trading Company (ECTC) is not technically an investment, but has been included in this covering report for completeness. ECTC is paying a commercial rate of interest on its loan from the Council – this to avoid breaking State-Aid rules.

3.5 The Council's 2024/25 Treasury Management Strategy and budget detailed an expected return on investments of £1,058,335, with then a further £243,000 of interest on the loan to ECTC.

4.0 Results

- 4.1 During 2024/25 the Council has operated within its approved treasury limits and Prudential Indicators; no changes have been made or proposed in relation to the counterparty values detailed in the Annual Treasury Management Strategy.
- 4.2 Interest rates on offer to the Council from Money Market Investment Deposit Accounts or fixed term deposits have remained relatively steady during the year, our average interest rate when the budget was built in February 2024 was 5.18% and this has reduced to 4.85% as at 30th September 2024. The interest receipts generated on these investments to the end of September 2024 were £801,667 significantly above that forecast in the budget.
- 4.3 As at 30th September 2024, the Council had cash investments of £36.327 million (£38.599 million in 2023), details of these investments are included in Appendix 1. With a further £6.575 million (£6.0 million in 2023) loan to ECTC.
- 4.4 While the loan to the Company is not specifically an investment, it generated the Council interest receipts, £128,272 up until 30th September 2024.
- 4.5 In total, the combination of interest receipts on both general investments and the loan to ECTC, are forecast to come in around £390,000 above budget at yearend.

5.0 Interest Payments

- 5.1 The Council has remained external debt free during the first six months of the financial year, and with the healthy cash balance at the end of September, it is expected to remain so for the remainder of the year.

6.0 Conclusion

- 6.1 The Council's Treasury Management Strategy, as approved on 20th February 2024, continues to offer the Council the best approach to Treasury Management and the policies contained within it will continue to be followed for the remainder of the financial year.
- 6.2 It should be noted that the economic and interest rate forecasts detailed in appendix 1 were those in place as at the 30th September 2024.

7.0 Additional Implications Assessment

- 7.1 In the table below, please put Yes or No in each box:

Financial Implications Yes	Legal Implications No	Human Resources (HR) Implications No
Equality Impact Assessment (EIA) No	Carbon Impact Assessment (CIA) No	Data Protection Impact Assessment (DPIA) No

- 7.2 Financial Implications - It is forecast that the Treasury Management function will provide additional income of £390,000 when compared to the approved budget,

this is recorded in the overall Finance Report for the Council (also on Committee's agenda this evening).

8.0 Appendices

Appendix 1 - Mid-year Review report 2024/25

9.0 Background Documents:

Treasury Management Strategy as approved by Full Council on the 20th February 2024.

Treasury Management Strategy Statement and Annual Investment Strategy

East Cambridgeshire District Council

Mid-Year Review Report 2024/25

7.	Compliance with Treasury and Prudential Limits	10
8.	Annual Investment Strategy	10

1. Background

1.1 Capital Strategy

In December 2021, the Chartered Institute of Public Finance and Accountancy, (CIPFA), issued revised Prudential and Treasury Management Codes. These require all local authorities to prepare a Capital Strategy which is to provide the following: -

- a high-level overview of how capital expenditure, capital financing and treasury management activity contribute to the provision of services;
- an overview of how the associated risk is managed;
- the implications for future financial sustainability.

1.2 Treasury Management

The Council operates a balanced budget, which broadly means cash raised during the year will meet its cash expenditure. Part of the treasury management operations ensure this cash flow is adequately planned, with surplus monies being invested in low-risk counterparties, providing adequate liquidity initially before considering optimising investment return.

The second main function of the treasury management service is the funding of the Council's capital plans. These capital plans provide a guide to the borrowing need of the Council, essentially the longer-term cash flow planning to ensure the Council can meet its capital spending operations. This management of longer-term cash may involve arranging long or short-term loans, or using longer term cash flow surpluses, and on occasion any debt previously drawn may be restructured to meet Council's risk or cost objectives.

Accordingly, treasury management is defined as:

"The management of the local authority's borrowing, investments and cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks."

2. Introduction

This report has been written in accordance with the requirements of the Chartered Institute of Public Finance and Accountancy's (CIPFA) Code of Practice on Treasury Management (revised 2021). The primary requirements of the Code are as follows:

1. Creation and maintenance of a Treasury Management Policy Statement which sets out the policies and objectives of the Council's treasury management activities.
2. Creation and maintenance of Treasury Management Practices which set out the manner in which the Council will seek to achieve those policies and objectives.
3. Receipt by the Full Council of an annual Treasury Management Strategy Statement - including the Annual Investment Strategy and Minimum Revenue Provision Policy - for the year ahead, a Mid-year Review Report and an Annual Report, (stewardship report), covering activities during the previous year. (Quarterly reports are also required for the periods ending April to June and October to December but may be assigned to a designated committee as deemed appropriate to meet the Treasury Management governance and scrutiny aspects of the Council.)

4. Delegation by the Council of responsibilities for implementing and monitoring treasury management policies and practices and for the execution and administration of treasury management decisions.
5. Delegation by the Council of the role of scrutiny of treasury management strategy and policies to a specific named body. For this Council, the delegated body is the Finance & Assets Committee.

This mid-year report has been prepared in compliance with CIPFA's Code of Practice on Treasury Management, and covers the following:

- An economic update for the first half of the 2024/25 financial year;
- A review of the Treasury Management Strategy Statement and Annual Investment Strategy;
- The Council's capital expenditure, as set out in the Capital Strategy, and prudential indicators;
- A review of the Council's investment portfolio for 2024/25;
- A review of the Council's borrowing strategy for 2024/25;
- A review of compliance with Treasury and Prudential Limits for 2024/25.

3. Economics and Interest Rates

3.1 Economics Update

- The third quarter of 2024 (July to September) saw:
 - GDP growth stagnating in July following downwardly revised Q2 figures (0.5% q/q)
 - A further easing in wage growth as the headline 3myy rate (including bonuses) fell from 4.6% in June to 4.0% in July;
 - CPI inflation hitting its target in June before edging above it to 2.2% in July and August;
 - Core CPI inflation increasing from 3.3% in July to 3.6% in August;
 - The Bank of England initiating its easing cycle by lowering interest rates from 5.25% to 5.0% in August and holding them steady in its September meeting;
 - 10-year gilt yields falling to 4.0% in September.
- The economy's stagnation in June and July points more to a mild slowdown in GDP growth than a sudden drop back into a recession. Moreover, the drop in September's composite activity Purchasing Managers Index, from 53.8 in August to 52.9, was still consistent with GDP growth of 0.3%-0.4% for the summer months. This is in line with the Bank of England's view, and it was encouraging that an improvement in manufacturing output growth could be detected, whilst the services PMI balance suggests non-retail services output grew by 0.5% q/q in Q3. Additionally, the services PMI future activity balance showed an uptick in September, although readings after the Chancellor's announcements at the Budget on 30th October will be more meaningful.
- The 1.0% m/m jump in retail sales in August was stronger than the consensus forecast for a 0.4% m/m increase. The rise was reasonably broad based, with six of the seven main sub sectors recording monthly increases, though the biggest gains came from clothing stores and supermarkets, which the ONS reported was driven by the warmer-than-usual weather and end of season sales. As a result, some of that strength is probably temporary.
- The government's plans to raise public spending by around £16bn a year (0.6% GDP) have caused concerns that a big rise in taxes will be announced in the Budget, which could weaken GDP growth in the medium-term. However, if taxes are raised in line with spending (i.e., by £16bn) that would mean the overall stance of fiscal policy would be similar to the previous government's plan to reduce the budget deficit. Additionally, rises in public spending tend to

boost GDP by more than increases in taxes reduce it. Our colleagues at Capital Economics suggest GDP growth will hit 1.2% in 2024 before reaching 1.5% for both 2025 and 2026.

- The further easing in wage growth will be welcomed by the Bank of England as a sign that labour market conditions are continuing to cool. The 3myy growth rate of average earnings fell from 4.6% in June to 4.0% in July. On a three-month annualised basis, average earnings growth eased from 3.0% to 1.8%, its lowest rate since December 2023. Excluding bonuses, the 3myy rate fell from 5.4% to 5.1%.
- Other labour market indicators also point to a further loosening in the labour market. The 59,000 fall in the alternative PAYE measure of the number of employees in August marked the fourth fall in the past five months. And the 77,000 decline in the three months to August was the biggest drop since November 2020. Moreover, the number of workforce jobs fell by 28,000 in Q2. The downward trend in job vacancies continued too. The number of job vacancies fell from 872,000 in the three months to July to 857,000 in the three months to August. That leaves it 34% below its peak in May 2022, and just 5% above its pre-pandemic level. Nonetheless, the Bank of England is still more concerned about the inflationary influence of the labour market rather than the risk of a major slowdown in labour market activity.
- CPI inflation stayed at 2.2% in August, but services inflation rose from a two-year low of 5.2% in July to 5.6%, significantly above its long-run average of 3.5%. Food and fuel price inflation exerted some downward pressure on CPI inflation, but these were offset by the upward effects from rising furniture/household equipment inflation, recreation/culture inflation and a surprisingly large rise in airfares inflation from -10.4% in July to +11.9% in August. As a result, core inflation crept back up from 3.3% to 3.6%. CPI inflation is also expected to rise in the coming months, potentially reaching 2.9% in November, before declining to around 2.0% by mid-2025.
- The Bank initiated its loosening cycle in August with a 25bps rate cut, lowering rates from 5.25% to 5.0%. In its September meeting, the Bank, resembling the ECB more than the Fed, opted to hold rates steady at 5.0%, signalling a preference for a more gradual approach to rate cuts. Notably, one Monetary Policy Committee (MPC) member (Swati Dhingra) voted for a consecutive 25bps cut, while four members swung back to voting to leave rates unchanged. That meant the slim 5-4 vote in favour of a cut in August shifted to a solid 8-1 vote in favour of no change.
- Looking ahead, CPI inflation will likely rise in the coming months before it falls back to its target of 2.0% in mid-2025. The increasing uncertainties of the Middle East may also exert an upward pressure on inflation, with oil prices rising in the aftermath of Iran's missile attack on Israel on 1 October. China's recent outpouring of new fiscal support measures in the latter stages of September has also added to the upshift in broader commodity prices, which, in turn, may impact on global inflation levels and thus monetary policy decisions. Despite these recent developments, our central forecast is still for rates to fall to 4.5% by the end of 2024 with further cuts likely throughout 2025. This is in line with market expectations, however, although a November rate cut still looks likely, December may be more problematic for the Bank if CPI inflation spikes towards 3%. In the second half of 2025, though, we think a more marked easing in inflation will prompt the Bank to speed up, resulting in rates eventually reaching 3.0%, rather than the 3.25-3.50% currently priced in by financial markets.
- Our forecast is next due to be updated around mid-November following the 30 October Budget, 5 November US presidential election and the 7 November MPC meeting and the release of the Bank of England Quarterly Monetary Policy Report.
- Looking at gilt movements in the first half of 2024/25, and you will note the 10-year gilt yield declined from 4.32% in May to 4.02% in August as the Bank's August rate cut signalled the start of its loosening cycle. Following the decision to hold the Bank Rate at 5.0% in September, the market response was muted, with the 10-year yield rising by only 5bps after the announcement. This likely reflected the fact that money markets had priced in a 25% chance of a rate cut prior to the meeting. The yield had already increased by about 10bps in the days leading up to the meeting, driven in part by the Fed's "hawkish cut" on 18 September. There is a possibility that

gilt yields will rise near-term as UK policymakers remain cautious due to persistent inflation concerns, before declining in the longer term as rates fall to 3.0%.

- The FTSE 100 reached a peak of 8,380 in the third quarter of 2024, but its performance is firmly in the shade of the US S&P500, which has breached the 5,700 threshold on several occasions recently. Its progress, however, may pause for the time being whilst investors wait to see who is elected the next US President, and how events in the Middle East (and Ukraine) unfold. The catalyst for any further rally (or not) is likely to be the degree of investors' faith in AI.

MPC meetings: 9 May, 20 June, 1 August, 19 September 2024

- On 9 May, the Bank of England's Monetary Policy Committee (MPC) voted 7-2 to keep Bank Rate at 5.25%. This outcome was repeated on 20th June.
- However, by the time of the August meeting, there was a 5-4 vote in place for rates to be cut by 25bps to 5%. However, subsequent speeches from MPC members have supported Governor Bailey's tone with its emphasis on "gradual" reductions over time.
- Markets thought there may be an outside chance of a further Bank Rate reduction in September, following the 50bps cut by the FOMC, but this came to nothing.
- Nonetheless, November still looks most likely to be the next month to see a rate cut to 4.75% but, thereafter, inflation and employment data releases, as well as geo-political events, are likely to be the determinant for what happens in the remainder of 2024/25 and into 2025/26.

3.2 Interest Rate Forecasts

The Council has appointed Link Group as its treasury advisors and part of their service is to assist the Council to formulate a view on interest rates. The PWLB rate forecasts below are based on the Certainty Rate (the standard rate minus 20 bps) which has been accessible to most authorities since 1 November 2012.

Our latest forecast on 28 May sets out a view that short, medium and long-dated interest rates will fall back over the next year or two, although there are upside risks in respect of the stickiness of inflation and a continuing tight labour market, as well as the size of gilt issuance.

Our PWLB rate forecasts below are based on the Certainty Rate (the standard rate minus 20 bps, calculated as gilts plus 80bps) which has been accessible to most authorities since 1 November 2012.

Link Group Interest Rate View	28.05.24									
	Dec-24	Mar-25	Jun-25	Sep-25	Dec-25	Mar-26	Jun-26	Sep-26	Dec-26	Mar-27
BANK RATE	4.50	4.00	3.50	3.25	3.25	3.25	3.25	3.00	3.00	3.00
3 month ave earnings	4.50	4.00	3.50	3.30	3.30	3.30	3.30	3.00	3.00	3.00
6 month ave earnings	4.40	3.90	3.50	3.30	3.30	3.30	3.30	3.10	3.10	3.20
12 month ave earnings	4.30	3.80	3.50	3.40	3.40	3.40	3.40	3.20	3.30	3.40
5 yr PWLB	4.50	4.30	4.10	4.00	3.90	3.90	3.90	3.90	3.90	3.80
10 yr PWLB	4.60	4.40	4.30	4.10	4.10	4.10	4.00	4.00	4.00	3.90
25 yr PWLB	5.00	4.80	4.70	4.50	4.50	4.40	4.40	4.40	4.30	4.30
50 yr PWLB	4.80	4.60	4.50	4.30	4.30	4.20	4.20	4.20	4.10	4.10

4. Treasury Management Strategy Statement and Annual Investment Strategy Update

The Treasury Management Strategy Statement, (TMSS), for 2024/25 was approved by this Full Council on 20th February 2024.

There are no policy changes to the TMSS; the details in this report update the position in the light of the updated economic position and budgetary changes already approved.

Prudential Indicator 2024/25	Original £000	Revised Prudential Indicator £000
Authorised Limit	10,000	10,000
Operational Boundary for External Debt	0	0
Capital Financing Requirement	13,909	12,402

5. The Council’s Capital Position (Prudential Indicators)

This part of the report is structured to update:

- The Council’s capital expenditure plans;
- How these plans are being financed;
- The impact of the changes in the capital expenditure plans on the prudential indicators and the underlying need to borrow; and
- Compliance with the limits in place for borrowing activity.

5.1 Prudential Indicator for Capital Expenditure

This table shows the revised estimates for capital expenditure and the changes since the capital programme was agreed at the Budget.

Capital Expenditure by Service	2024/25 Original Budget £000	Current Position £000	2024/25 Revised Estimate £000
Operational Services	4,275	567	2,718
Finance & Assets	2,300	1,638	2,990
Total capital Expenditure	6,575	2,205	5,708

The updated figures in the above table reflect the following changes.

- £1.105 million of slippage from 2023/24 has been added to the budget.
- Two projects are showing a forecast underspend of £1 million, these are the purchase of Waste bins (to replace black sacks), which will now happen in 2025/26 and costs of the Bereavement Centre where the timetable is now behind that built into the original budget, with work on the ground not now expected until 2025/26.

5.2 Changes to the Financing of the Capital Programme

The table below draws together the main strategy elements of the capital expenditure plans (above), highlighting the original supported and unsupported elements of the capital programme, and the expected financing arrangements of this capital expenditure. The borrowing element of the table increases the underlying indebtedness of the Council by way of the Capital Financing Requirement (CFR), although this will be reduced in part by revenue charges for the repayment of debt (the Minimum Revenue Provision).

Capital Expenditure	2024/25 Original Budget £000	2024/25 Revised Estimate £000
Total capital expenditure	6,575	5,708
Financed by:		
Capital receipts	209	337
Capital grants	603	992
Section 106 / CIL	1,600	911
Revenue		
Total financing	2,413	2,250
Borrowing requirement	4,163	3,468

5.3 Changes to the Prudential Indicators for the Capital Financing Requirement (CFR), External Debt and the Operational Boundary

The table below shows the CFR, which is the underlying need to incur borrowing for a capital purpose. It also shows the expected debt position over the period, which is termed the Operational Boundary.

Prudential Indicator – Capital Financing Requirement

The revised Capital expenditure position has reduced the forecast Capital Financing Requirement as at the 31st March 2025.

Prudential Indicator – the Operational Boundary for external debt

The Council’s Operational Boundary for external debt is £0, as the intention is that all debt over the MTFS timeline will be met from internal borrowing. The calculation of the CFR is as detailed in the below table, this is all funded from internal borrowing.

	2024/25 Original Estimate £000	2024/25 Revised Estimate £000
CFR – Brought forward	10,832	10,652
CFR – New borrowing	4,163	3,468
CFR – Repayment from ECTC	(500)	(1,125)
CFR – Minimum Revenue Provision	(586)	(593)
Total CFR	13,909	12,402
Net movement in CFR	3,077	1,750
External Borrowing	0	0
Internal Borrowing	13,909	12,402
Total debt (year end position)	13,909	12,402

5.4 Limits to Borrowing Activity

The first key control over the treasury activity is a prudential indicator to ensure that over the medium term, net borrowing (borrowings less investments) will only be for a capital purpose. **Gross external borrowing** should not, except in the short term, exceed the total of CFR in the preceding year plus the estimates of any additional CFR for 2024/25 and next two financial years. This allows some flexibility for limited early borrowing for future years. The Council has approved a policy for borrowing in advance of need which will be adhered to if this proves prudent.

	2024/25 Original Estimate £000	2024/25 Revised Estimate £000
External Borrowing	0	0
Total External debt	0	0
CFR (year end position)	13,909	12,402

A further prudential indicator controls the overall level of borrowing. This is **the Authorised Limit** which represents the limit beyond which borrowing is prohibited and needs to be set and revised by Members. It reflects the level of borrowing which, while not desired, could be afforded in the short term, but is not sustainable in the longer term. It is the expected maximum borrowing need with some headroom for unexpected movements. This is the statutory limit determined under section 3 (1) of the Local Government Act 2003.

Authorised limit for external debt	2024/25 Original Indicator	2024/25 Revised Indicator
Borrowing	10,000	10,000
Other long-term liabilities	0	0
Total	10,000	10,000

6. Borrowing

The Council's revised capital financing requirement (CFR) for 2024/25 is £12.402 million. The CFR denotes the Council's underlying need to borrow for capital purposes. If the CFR is positive the Council may borrow from the PWLB or the market (external borrowing), or from internal balances (internal borrowing). The balance of external and internal borrowing is generally driven by market conditions. Table 5.3 shows the Council has no external borrowing and is forecast to have utilised £12.402 million of cash flow funds in lieu of borrowing on 31st March 2025. This is a prudent and cost-effective approach in the current economic climate but will require ongoing monitoring if gilt yields remain elevated, particularly at the longer-end of the yield curve (25 to 50 years).

The capital programme is being kept under regular review due to the effects of on-going budgetary pressures. Our borrowing strategy will, therefore, also be regularly reviewed and then revised, if necessary, to achieve optimum value and risk exposure in the long-term.

It is anticipated that no borrowing will be undertaken during this financial year and throughout the MTFS period.

7. Compliance with Treasury and Prudential Limits

It is a statutory duty for the Council to determine and keep under review the affordable borrowing limits. During the half year ended 30th September 2024, the Council has operated within the treasury and prudential indicators set out in the Council's Treasury Management Strategy Statement for 2024/25. The Director, Finance reports that no difficulties are envisaged for the current or future years in complying with these indicators.

All treasury management operations have also been conducted in full compliance with the Council's Treasury Management Practices.

8. Annual Investment Strategy

The Treasury Management Strategy Statement (TMSS) for 2024/25, which includes the Annual Investment Strategy, was approved by the Council on 20th February 2024. In accordance with the CIPFA Treasury Management Code of Practice, it sets out the Council's investment priorities as being:

- Security of capital
- Liquidity
- Yield

The Council will aim to achieve the optimum return (yield) on its investments commensurate with proper levels of security and liquidity and with the Council's risk appetite. In the current economic climate, it is considered appropriate to keep investments short term to cover cash flow needs, but also to seek out value available in periods up to 12 months with high credit quality financial institutions, using the Link suggested creditworthiness approach, including a minimum sovereign credit rating and Credit Default Swap (CDS) overlay information.

Creditworthiness

The UK's sovereign rating has proven robust through the first half of 2024/25. The new Labour Government is expected to outline in detail its future fiscal proposals in the Budget scheduled for 30 October 2024.

Investment Counterparty criteria

The current investment counterparty criteria selection approved in the TMSS is meeting the requirement of the treasury management function.

CDS prices

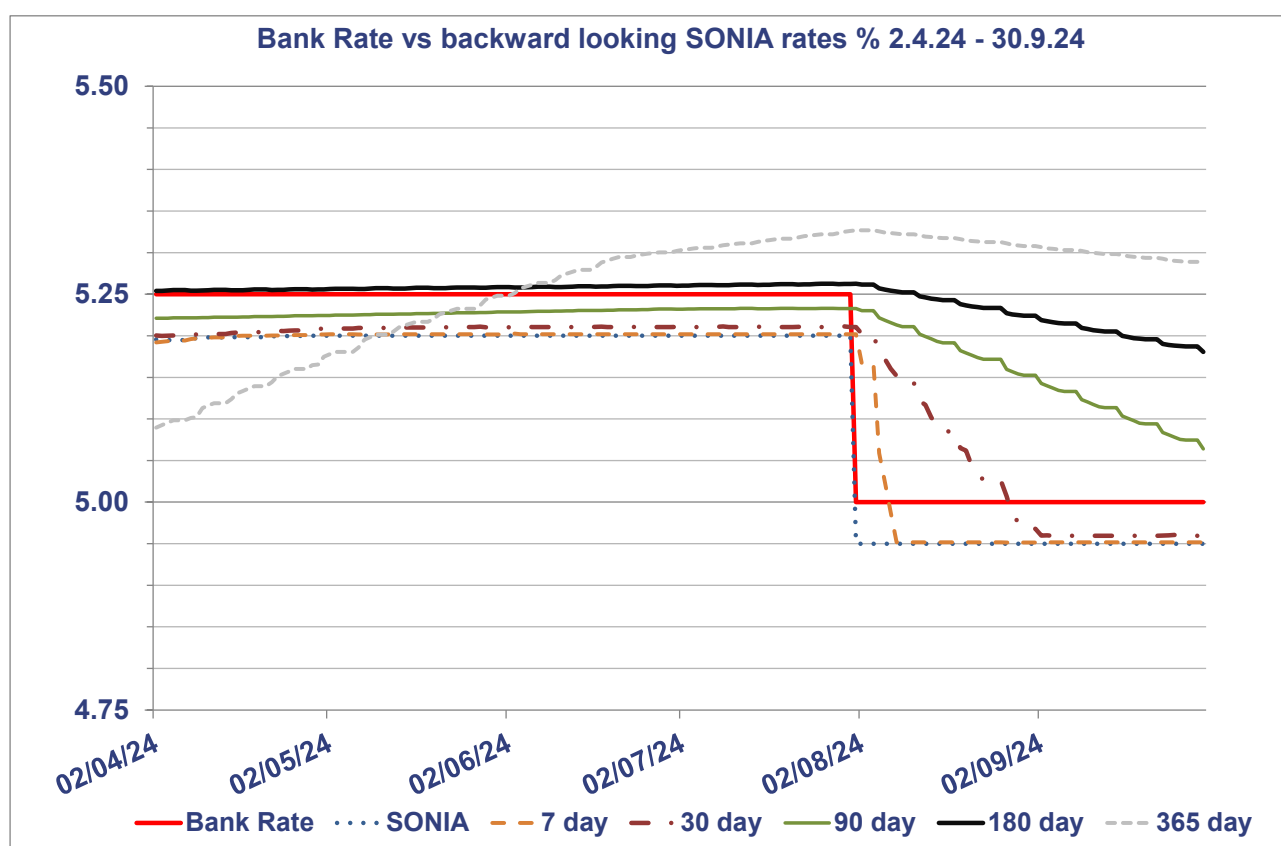

It is noted that sentiment in the current economic climate can easily shift, so it remains important to undertake continual monitoring of all aspects of risk and return in the current circumstances.

Investment balances

The average level of funds available for investment purposes during the first half of the financial year was £32.545 million. These funds were available on a temporary basis, and the level of funds available was mainly dependent on the timing of Council Tax and Business Rate receipts, the payment of precepts to our precepting authorities, receipt of grants and progress on the capital programme.

Investment performance year to date as of 30 September 2024

The table below covers the first half of 2024/25.

	Bank Rate	SONIA	7 day	30 day	90 day	180 day	365 day
High	5.25	5.20	5.20	5.21	5.23	5.26	5.33
High Date	02/04/2024	03/05/2024	13/05/2024	26/06/2024	26/07/2024	26/07/2024	01/08/2024
Low	5.00	4.95	4.95	4.96	5.06	5.18	5.09
Low Date	01/08/2024	01/08/2024	27/08/2024	04/09/2024	30/09/2024	30/09/2024	02/04/2024
Average	5.17	5.12	5.12	5.15	5.20	5.25	5.26
Spread	0.25	0.25	0.25	0.25	0.17	0.08	0.24

Investment performance year to date as of 30 September 2024

The Council’s Annual Investment Strategy details that we will benchmark against the 7-day SONIA (Sterling Overnight Index Average) Compound Rate. As per the table above, the average 7-day rate

at the 30th September 2023 was 5.12%. Our calculated average interest rate received in the year to-date was 4.93%.

The Council's budgeted investment return for 2024/25 is £1.058 million with performance for the year to date being £270,000 above budget (as at 30th September 2024).

Fund investments at 30th September 2024

Investments	Amount	Interest Rate %
MMF Aberdeen	£5,000,000	5.02
MMF Blackrock	£5,000,000	4.97
MMF Insight	£3,500,000	5.02
Standard Chartered	£6,000,000	5.07
Lloyds Bank	£5,000,000	4.86
Santander	£5,000,000	4.00
SMBC	£6,000,000	5.22
NatWest (RFB)	£827,136	3.25
Total	£36,327,136	

Approved limits

Officers can confirm that the approved limits within the Annual Investment Strategy were not breached during the period ended 30th September 2024.
